RESEARCH INTERESTS

Applied Topology, Topological Data Analysis (TDA), Discrete and Computational Geometry, Shape Matching, Statistical Finance, and Topological Deep Learning.

My research primarily revolves around the interface of *mathematics*, *computer science*, and the mathematical foundations of *data science*. More specifically, I am motivated to develop provable inference techniques for data science that are inspired by topology and geometry. I also keep a keen interest in applying TDA to fascinating, real-world problems arising in fields, like finance, dynamical systems, biology, medicine, and genetics.

EDUCATION

- **Doctor of Philosophy in Mathematics** August 2014–December 2020
Tulane University, New Orleans, LA, USA.
Advisor: **Prof. Carola Wenk**
Courses: computational geometry, computational topology, topological data analysis, differential geometry, differentiable manifolds, algorithms, data structures, computational complexity, applied mathematics, and scientific computing.
- **Master of Science in Mathematics** August 2009–May 2012
Tata Institute of Fundamental Research, Bangalore, India
Courses: ordinary and partial differential equations, probability theory, complex analysis, functional analysis, numerical linear algebra, measure theory, mechanics.
- **Bachelor of Science in Mathematics (Hons.)** July 2006–May 2009
Ramakrishna Mission Vidyamandira, Calcutta University, West Bengal, India
Courses: calculus, real analysis, linear algebra, numerical analysis, game theory, statistics, physics.

WORK EXPERIENCE

- **Assistant Professor** August 2024–current
Data Science Program, George Washington University, Washington D.C., USA
- **Visiting Assistant Professor** August 2023–July 2024
Data Science Program, George Washington University, Washington D.C., USA
- **Postdoctoral Research Fellow** January 2021–July 2023
School of Information, University of California, Berkeley, USA
Role: The responsibilities included conducting research broadly in data science, forging new research collaborations, organizing research webinar series.

PREPRINTS

7. Rafal Komendarczyk, **SM**, Atish Mitra. Vietoris–Rips Shadow for Euclidean Graph Reconstruction, 19 pages, June 2025. Available at: [arXiv:2506.01603 \[math.AT\]](#)
 - Submitted to *Journal of Applied and Computational Topology*
6. Joshua Dorrington, **SM**, Atish Mitra, James Moukheiber, Demi Qin, Jacob Sriraman, Kristian Strommen. Topology of the Polar Vortex and Montana Weather, 6 pages, Mar 2025. Available at: [arXiv:2503.20743 \[math.DS\]](#)
 - Submitted to *ATMCS'25*

5. Enrique Alvarado, Daniela Beckelhymer, Joshua Dorrington, Tung Lam, **SM**, Jasmine Noory, María Sánchez Muniz, Kristian Strommen. Detecting the Indian Monsoon using Topological Data Analysis , 5 pages, Mar 2025. Available at: [arXiv:2504.01022](https://arxiv.org/abs/2504.01022) [physics.ao-ph]
 • Submitted to *ATMCS'25*
4. Buddha Nath Sharma, Anish Rai, SR Luwang, Md. Nurujjaman, **SM**. Causality Analysis of COVID-19 Induced Crashes in Stock and Commodity Markets: A Topological Perspective , 20 pages, Feb 2025. Available at: [arXiv:2502.14431](https://arxiv.org/abs/2502.14431) [q-fin.ST]
 • Submitted to *Physica A*
3. Henry Adams, **SM**, Fedya Manin, Nicolò Zava, Žiga Virk. Lower Bounding The Gromov–Hausdorff Distance In Metric Graphs, 20 pages, Nov 2024. Available at: [arXiv:2411.09182v1](https://arxiv.org/abs/2411.09182v1) [math.MG]
 • Submitted to *Discrete and Computational Geometry*
2. Halley Fritze, **SM**, Marissa Masden, Atish Mitra, Michael Stickney. Embedded Graph Reconstruction under Hausdorff Noise. Available at: [arXiv:2410.19410](https://arxiv.org/abs/2410.19410) [cs.CG]
 • Presented at *FWCG'24*

GRADUATE TEACHING EXPERIENCE

- **Linear Algebra for Data Science** Summer 2024
Data Science Program, George Washington University, USA
Topics: linear algebra foundations, Gaussian elimination, pivoting techniques for stability, LU decomposition, eigenvalues and eigenvectors, solving linear systems using iterative methods, projections and linear regression, SVD and applications. Website: linalg.mathematics.land
- **Algorithm Design (DATS 6001)** Spring 2024–current
Data Science Program, George Washington University, USA
Topics: basics of computational complexity, data structures (array, stack, queue, tree, etc), algorithms (search, sort, etc), and programming paradigms like dynamic programming and greedy algorithms.
Website: 6001-majhi.datasci.land
- **Topological Data Analysis (CS)** Fall 2023
National Institute of Technology, Sikkim, India

* Undergraduate student at the time of research or submission

* Undergraduate student at the time of research or submission

Topics: topological spaces, metric spaces and their examples, simplicial complexes, homology in $\mathbb{Z}/2$ coeff, persistent homology, bottleneck and Wasserstein distance, and non-linear time-series analysis using TDA.
Website: tda.mathematics.land

- **Computer Science Foundations (DATS 6450)**
 Data Science Program, George Washington University, USA
Topics: computer design, programming in Python, object-oriented programming

Fall 2023
- **Introduction to Data Mining (DATS 6103)**
 Data Science Program, George Washington University, USA
Topics: data wrangling, linear and logistic regression, classification, clustering, data visualization, support vector machines, machine learning algorithms.

Fall 2023–current
- **Statistics for Data Science (MIDS 203)**
 School of Information, University of California, Berkeley, USA
Topics: probability theory, sampling distributions, estimators and convergence theorems, confidence intervals, hypothesis testing, and regression.

August 2020–July 2023
- **Linear Algebra, Complex Analysis**
 Christ University and Scimetric Pvt Ltd, Bangalore, India

January 2013–June 2013
- **Analysis, Linear Algebra, Complex Analysis**
 GATE-IIT Coaching Institute, JP Nagar, Bangalore, India
 Graduate level, for competitive national exams, e.g., National Eligibility Test

November 2011–July 2012
- **Analysis and Linear Algebra**
 MES College, Department of Mathematics, Malleswaram, Bangalore, India

February 2012–July 2012

UNDERGRADUATE TEACHING EXPERIENCE

- **Data Science Capstone (DATS 4001)**
 Data Science Program, George Washington University, USA

Fall 2024
- **Undergraduate Statistics for Business Students (MATH 1140)**
 Tulane University, USA
Topics: sampling methods, descriptive statistics, probability theory, random variables, limit theorems, confidence intervals, hypothesis testing, and linear regression.

Summer 2019

OTHER TEACHING

- **Graduate Teaching Assistant**
 Tulane University, USA

Fall 2014–Spring 2017

INVITED TALKS AND ACCEPTED ABSTRACTS

- **Title:** Predicting the Onset and Withdrawal of the Indian Monsoon
 using Persistent Homology
 AMS Special Session: Climate Science at the Interface Between Topological Data Analysis and Dynamical Systems Theory, Joint Mathematics Meetings, Seattle, 2025

upcoming: January 9, 2025
- **Title:** Lower Bounding the Gromov–Hausdorff distance in Metric Graphs
 The 31st Fall Workshop on Computational Geometry, Tufts University

Nov 14–15, 2024
- **Title:** A Taste of Topological Data Analysis (TDA): Reconstruction of Shapes
 Indian Institute of Technology, Mandi, India

Oct 14, 2024
- **Title:** A Taste of Topological Data Analysis (TDA): Reconstruction of Shapes
 Vellore Institute of Technology, Chennai, India

Oct 8, 2024

- **Title:** Demystifying Latschev's Theorem
Symposium on Computational Geometry, Athens, Greece
June 14, 2024
- **Title:** Demystifying Latschev's Theorem
Montana State University
March 28, 2024
- **Title:** Demystifying Latschev's Theorem
Applied Algebraic Topology Research Network (AATRN)
Available on: [YouTube](#)
August 23, 2023
- **Title:** Graph Mover's Distance
The 34th Canadian Conference on Computational Geometry, Montreal, Canada
August 2–4, 2023
- **Title:** Similarity Measures for Geometric Graphs
The 30th Fall Workshop on Computational Geometry
North Carolina State University, USA
October 14–15, 2022
- **Title:** Topological Methods in the Reconstruction and Comparison of Shapes
Mathematics Department, ICFAI University, Tripura, India
February, 2022
- **Title:** A Taste of Topological Data Analysis (TDA): Reconstruction of Shapes
Department of Mathematics, Hunter College, NY, USA
September, 2021
- **Fall Workshop on Computational Geometry**
Queens College, New York, USA
October, 2018
- **Fall Workshop on Computational Geometry**
SUNY (Stony Brook), New York, USA
November, 2017

PHD THESES READER

- Will Tran, Tulane University,
Thesis Title: Distortion and Curvature in the Shape Reconstruction Problem
Spring 2024

GRADUATE STUDENT ADVISEES

- Khush Shah and Shikha Kumari, current data science masters students
George Washington University,
Project Title: Matching geometric graphs using Graph Neural Networks
August 2023–current
- Anish Rai, PhD student at
National Institute of Technology, Sikkim, India
Project Title: Prediction of stock market crashes using topological data analysis
August 2022–August 2024
- Buddha Nath Sharma, PhD student at
National Institute of Technology, Sikkim, India
Project Title: Applications of topological data analysis in financial markets
August 2022–current

UNDERGRADUATE STUDENT MENTEES

- James Moukheiber
George Washington University,
Project Title: Topological Deep Learning
August 2024–current

DEPARTMENT/UNIVERSITY SERVICE

- Undergraduate Advisor
George Washington University, Data Science Program
August 2024–current

AWARDS, SCHOLARSHIPS, RECOGNITION

- **NSF: Mathematical & Physical Sciences (MPS), Declined**
Title: Geometric Approach to the Shape Reconstruction from Noisy Data
Role: co-PI
PI: Rafal Komendarczyk, Tulane University, New Orleans.
- **Travel Grant**, University of California, Berkeley
- **UGC-CSIR NET Research Fellowship**, India, June 2012
- **TIFR Junior Research Fellowship** for pursuing Integrated PhD studies at TIFR-CAM, Bangalore, India. August 2009.
- **Secured grade “A” in SCIENCE TALENT SEARCH EXAMINATION**
conducted by JATIYA VIJNAN PARISAD and INDIAN SCIENCE CONGRESS ASSOCIATION

ACADEMIC SERVICES

- I have been a reviewer for journals, like Discrete and Computational Geometry, Foundations of Data Science, Journal of Combinatorial Optimization, and International Journal of Computational Geometry.
- I have been a reviewer for conferences, like the International Symposium on Computational Geometry, International Symposium on Spatial and Temporal Databases, European Workshop on Computational Geometry, ACM International Conference on Advances in Geographic Information Systems, WADS Algorithms and Data Structures Symposium.
- I organized SIAM Graduate Student Chapters at Tulane University.
- I have been organizing a data science webinar series at the University of California, Berkeley.

COMPUTATIONAL SKILLS

Java, C, R, Python, Ruby, JavaScript, SQL, Bash.

SOFTWARE PROJECTS

- **Simplicial Complexes in JS** [GitHub](#)
JavaScript implementation of some of the widely used computations on simplicial complexes. The library also implements the Smith Normal Form in order to compute the homology groups of an abstract complex.
- **Shape Reconstruction Visualization** [WebApp](#) | [GitHub](#)
To complement my PhD research, I implemented my topological reconstruction algorithm for planar metric graphs in this library. The library is written in JavaScript and made available to users as a web-app.
Skills: JavaScript, HTML, CSS.

POPULAR MEDIA

- Interviewed by GWU Hatchet for an [Article](#) August 2024

ENTREPRENEURIAL EXPERIENCE

- **Scimetric Edulabs Private Limited** December 2012–April 2017
Bangalore, India
Role: **co-founder** and **director**
In this start-up venture, our objective was to motivate and train students in higher education. We won the franchise to work with several private colleges in India. We coached science students for standardized entrance tests for PhD and academic jobs. The company employed 6 trainers.

HOBBY

In my spare time, I write tutorials on *random* topics in order to make mathematics and statistics a little more interactive; they can be found here: <https://www.smajhi.com/tutorials>. I also enjoy playing the piano and classical guitar.
